The Island La Palma

La Isla Bonita and La Isla Verde, that means the beautiful and green island the native "Palmeros" call their island. This is true, because this green island of the canarian archipelago is indeed marvellous.

On about 730 square kilometres the island offers many scenes of natural beauty, vegetation and climate. The equable climate of La Palma offers vacations at any time of the year; of course the Canarian Islands are well known for the sunshine and pleasant warm weather in winter but the advantage of La Palma is that as well in midsummer the temperatures are pleasant. The high temperatures of the Mediterranean which makes people inactive, sunbath and swim only are not applicable to La Palma. As well in midsummer you can take a walk, make excursions or travel by foot.

The National Park Caldera de Taburiente with a wide forest and many plants dominates the Northern Part of the Island. With its diameter of 10 kilometres it has the greatest crater so far known; surrounded by a mountain chain up to 2400 metres which externally – wrinkled by deep ravines – called Barancos- steep to the sea. This mountain chain follows- leading to the south- another wooded mounting chain of about 1800 metres and about 24 kilometres length. The Cumbre Nueva and the Cumbre Vieja divide the southern part of La Palma in the more or less steep and raining east-side with the marvellous capital Santa Cruz de La Palma and its airport and the smoothly down going west-side with sunshine, the fruitful productive Aridane Valley, the access to Caldera and the 3 most beautiful fine lava beaches (=playas) of the island as well to the FINCA LA BREVERA.

Finca La Brevera

The residence La Brevera is in the small village Las Manchas Ariba, between Los Llanos de Aridane and San Nicolas in the west of the island. The country house is constructed in canarian style on an estate of 5000 square metres which is terraced. Here are growing many trees of all kinds, i.e. orange, almonds, mespilus germanica, and peaches, as well as palm-trees, cactus, wine grapes, blooming bushes and all kind of flowers, showing a rich vegetation. The terraced arrangement makes the apartments (2 apartments, 1 studio) absolutely independent. Situated on different levels each apartment has a large terrace and a separate entrance.

Beside the country house a small house (studio) - likewise in canarian style - with large terraces can be found on the Finca. The four apartments offer a wonderful view all round: the green Aridane Valley, the mighty mountains of the Caldera as well as the Cumbre Nueva and the sea. Nearly every night there will be a magnificent sunset and sometimes appear the contours of the island Hierro. Albeit the Finca is in the country it is an ideal starting point for every possible excursion. Every place and object of interest is accessible within 5 to 15 minutes on comfortable roads, i.e. the lively town Los Llanos de Aridane (6 km) with an ancient city, a beautiful plaza surrounded by laurel trees and its church of the 16th century, the seaside resort Puerto Naos (6 kilometres) with a beautiful promenade and a fine Lava Playa, or the small idyllic fishing port Puerto de Tazacorte with a nice playa and excellent Fish-Restaurants and the only natural entrance to the Caldera Tuburiente with the largest ravine called "Barranco de Las Angustias" which means the ravine of mortal terror! No more than 10 minutes are needed to the tunnel which is the connection to the
